Accessing information The easy way

A screenshot of a web browser displaying 'Nik's Homepage'. The page features a dark blue header with a search bar and navigation tabs. The main content area is a grid of article thumbnails. The first row includes 'Two Contrasting Views of Educational Technology', 'Ask Oprah a Question', and 'Highly recommended ELT Blogs'. The second row includes 'LearnEnglish Podcasts - Themes - April Fool's Day', '26 iBooks Author How-to Videos', and 'Box of Tricks - Technology and Education'. The third row includes 'LearnEnglish Podcasts - Themes - Circus', 'Handy New Ways to Organize File in Google Drive', and 'FUTURE-MAKING SERIOUS GAMES CONSOLIDATION'. Each article thumbnail shows a preview image and a brief text snippet.

Evaluating information

The collage features several overlapping screenshots of digital tools and websites:

- Instapaper:** A screenshot of the Instapaper interface, showing a list of saved articles. The top navigation includes "Browse", "Unread", "Liked", and "Archive". A specific article titled "Teach for iPad on the iTunes App Store" is highlighted.
- Pinterest:** A screenshot of a Pinterest board titled "Business Infographics" by Nik Peachey, featuring various infographic cards such as "PERKS", "STRESS LESS", and "THE 50th ANNIVERSARY OF THE BARCODE".
- Scoopify:** A screenshot of the Scoopify website, displaying a "Learning Technology" collection. It includes articles like "Record & Share your Ideas | Present.me" and "The Early Results Of An iPad Classroom Are In. - Edudemic".
- Meaki:** A screenshot of the Meaki website, showing a "Video Tools and Resources" section. It lists tools like Loopster.com and Mobento, along with a "Surf Clipset" window that displays a collection of 94 clips.
- Public Domain Review:** A screenshot of the Public Domain Review website, showing a collection of videos from the past.

Two Contrasting Views of Educational Technology

I'd like to share a couple of videos with you that I have used recently in the courses I teach. I find these videos particularly interesting because they show such contrasting approaches to learning and in particular - for want of a better word - e-learning.

This first one is from the early 1950's and is about something called a 'teaching machine' which was created by behavioural psychologist B F Skinner.

The screenshot shows the Scoop.it website interface. The main article is titled 'Learning Technology' and is curated by Nik Peachey. It has 101.5K views and is shared on various social media platforms. The article content includes:

Record & Share your Ideas | Present.me

From present.me - October 18, 11:10 AM

Present.me is your slides, and a video of you presenting them, side by side on the screen at the same time. It's the next best thing to being in a room with people you want to communicate with, and as it's on demand, it's available for anyone to view whenever it suits them. The potential for Present.me for Educators is endless- it is perfect for the flipped classroom, for students to submit projects, practise their presentation skills and much, much more.

And Present.me is now available in a new multi-user version. As an academic institution you can sign up for a Team account which provides your school, college or university with a private portal in which you can create, view and manage presentme's.

The Early Results Of An iPad Classroom Are In. - Edudemic

From edudemic.com - November 14, 8:22 PM

While the decision to share these positive results is a direct result of the positive impact on student learning, it is also important to realize the impact this initiative is having with teachers. I've observed the collective knowledge base of our teachers grow at a rate that far exceeds any other period of time in my 13-years at this school. I've never observed anything else that has had the impact on teacher personal learning like the introduction of the iPad.
